PROFESSIONAL EXPERIENCE

The Community Preservation Corporation (CPC)

New York, NY

Asset Management Summer Analyst

June 2026 - August 2026

- Monitored diverse portfolios valued up to \$353M of 10,000+ units across thousands of commercial real estate loans, proactively identifying credit risk through rigorous DCR analysis and watchlist tracking, successfully preventing all foreclosures
- Supported asset management for CPC's \$5.9B Community Stabilization Partners portfolio, contributing to compliance reviews and property inspections across 35,000+ rent-regulated units while liaising with borrowers and ensuring investor satisfaction

GTIS Partners

New York, NY

Private Equity Summer Analyst

June 2025 - August 2025

- Received one-on-one mentorship from the CCO alongside 10+ senior executives to learn strategic decision-making in finance while collaborating directly with the CTO and IT Analyst on systems support, software deployment, and strategic IT initiatives
- Organized and maintained deal pipeline by categorizing assets as active or closed deals and segmenting by Opportunity Zone designations (OZ-1 or OZ-2) enabling enhanced portfolio tracking and strategic oversight for senior leadership
- Contributed to AI integration initiatives to improve operational efficiency and support technological advancement goals

PROJECT EXPERIENCE

Prosperity | *Python, R, JavaScript, HTML, CSS*

September 2025

- Engineered financial modeling platform at HackMIT analyzing 20+ user financial metrics to generate tailored investment recommendations, multi-year budget forecasts, optimized debt repayment strategies with real-time data visualization
- Designed interactive financial dashboards with 5+ visualization types including waterfall charts and Monte Carlo projections, allowing users to model debt payoff acceleration, compare ROI across investment strategies and long-term wealth trajectories

Toxic Beauty: The Price of Harm | *Python, R, JavaScript, HTML, CSS*

May 2025

- Spearheaded a multi-dimensional investigation into carcinogenic beauty product exposure, synthesizing sentiment across 100+ news articles and 5+ years of market data to model downstream effects on investor behavior and equity performance
- Engineered Python and R-powered statistical pipelines to detect volatility patterns driven by adverse media cycles, applying NLP-assisted correlation techniques to quantify how shifts in public perception translated into measurable stock fluctuations

LEADERSHIP EXPERIENCE

StackHacks, Binghamton University

Binghamton, NY

President and Co-Founder

April 2024 - Present

- Co-Founded StackHacks, a student-run software engineering organization committed to empowering underrepresented students
- Direct Executive Board and 4 specialized project divisions, delivering workshops, events, and product strategy for 100+ students
- Drove community growth by leading marketing efforts across multiple channels, leading to a 600% increase in membership

Barclays Equity Research Case Competition

Vestal, NY

Competitor

January 2026 - April 2026

- Spearheaded equity research coverage for Lantheus Holdings (NASDAQ: LNTH) with evidence-backed BUY recommendation
- Built detailed analytical models incorporating WACC calculations (9.8%), revenue projections through 2028, and beta analysis (0.72), resulting in LNTH price target of \$130.00 representing 25.0% upside potential from \$104.00 current trading

AWARDS & HONORS

ColorStack StackedUp Summit, Scholar | San Francisco, CA

August 2025 & August 2026

- Selected as 1 of only 480 students from 16,000+ eligible ColorStack members nationwide for the prestigious annual summit
